

Commitment • Integrity • Excellence

Dear Friends,

Are you a former Nuclear Weapons or Uranium Industry employee that suffers from a work-related illness?

Did you know that you may be entitled to significant health care benefits and financial compensation?

Benefits have been established for you through the Energy Employees Occupational Illness Compensation Program Act (EEOICPA) and the Radiation Exposure Compensation Act (RECA). These government programs were created to compensate you for your patriotic service in the nuclear weapons and uranium industry that might have exposed you to harmful radiation or other toxic substances. If you feel you have health concerns due to exposure, you may be qualified for the program.

Nuclear Care Partners is the premier in-home health care provider for former employees or subcontractors who worked in the nuclear weapons field or were uranium miners, millers or transporters. Our health care professionals understand the issues and specialize in caring for people suffering from the complications from radiation or toxic exposures.

EEOICPA beneficiaries may be eligible for FREE in-home care and other benefits. That means your care, including doctor's visits and medication, may be yours with no deductibles or co-pays.

If you already have these benefits through Department of Labor (DOL), we can help you maximize the benefits that the program provides. We also assist in getting additional conditions added to your benefits card and if you are currently receiving home care services and are not satisfied, we would love to show you how simple it is to switch home care providers. Let us show how we are different.

We understand that these programs can be overwhelming, especially in regards to the amount of paperwork and specific documentation that is necessary to file for benefits. Having helped our patients successfully maneuver through these government programs, we know how complicated the process can be. We are here to help support you!

Looking forward to meeting with you,

Jackie Kraai
